

# Home is where the hearth is

Make your house a home with a cosy fireplace or wood burning stove. Don't forget to get it professionally installed, for complete peace of mind.

Nothing says home quite like a beautiful fireplace or stove. A focal point for a room, a spot to gather around, a cosy source of warmth and comfort.

If you're thinking about installing a new fireplace or stove, look no further than the East Lothian-based

Gratebuild Ltd. Owner Kevin Johnston started out fitting stoves and fireplaces for a shop before setting up on his own.

Gratebuild Ltd can supply and install your fire or stove or can do installation only, allowing you to source your own model if you wish. Kevin can advise on the best model for your home, budget and requirements. They are a recommended installer for Forest Fires at Christies a specialist stove company situated in Edinburgh.

The company offer a complete fire and stove solution which means they carry out full servicing and maintenance work on all stoves and fires and also do chimney repairs and fit chimney liners, pots and cowl.

They can install all types of stoves or fireplaces as well as installing new hearths, baby brick chambers, new mantles and new cast inserts.

All that and Gratebuild Ltd are even proud sponsors of the local Preston Athletic youth team!

Kevin, who started his business in 2000, says that his customers are always delighted with the end result. "Installing a stove or fireplace is complex and challenging and must be done by

a professional," he explains. "Our customers find that our workmanship is second-to-none and that the experience of working with us is hassle-free, from start to finish."

Kevin's workmanship is testament to the fact that he is a member of the Guild of Master Craftsmen, as well as being HETAS registered.

"Stoves are a very popular choice for heating the home at the moment," he says. "However, they are a major risk to your home and family if they are not installed properly."

Tempted? Bear in mind that you don't even need to have a chimney to have a wood burning stove in

your home. Gratebuild Ltd can install a stove with an insulated flue system, thus avoiding the need for a chimney while providing your room with a striking focal point.

Kevin carries out all estimates himself, and issues a completion certificate upon finishing each job. His service is friendly, professional and efficient, and his finishing is exacting and precise. So if you want to make your home feel more cosy and warming, make Gratebuild Ltd your first port of call. TC
